project overview

4 EXPORT intends to boost the internationalisation of SMEs by promoting interdisciplinary apprenticeship training and education in Europe. Interdisciplinary apprenticeship has been proven to be a key way to add to a company an innovative perspective regarding internationalization. Except for SMEs, apprentices will benefit too, as they will acquire innovative capabilities and skills, through their participation in interdisciplinary apprenticeship programs, implemented in an international environment.

our goals

Raise awareness on the benefits of apprenticeship for internationalization.

Participate in online training courses (MOOCs) to become capable to deliver a training based on your company's internationalization needs.

Develop in-company trainers' competences and skills through a MOOC in order for them to be able to respond to the company's internationalization needs.

Improve the in-company trainers' ability to interact with trainees/apprentices and offer learning opportunities that are tailored to their needs.

The project will come up with the following tangible results:

Research Study and Analysis on apprenticeship schemes in Europe, specific needs of interdisciplinary apprenticeship in countries, and role of in-company tutor

Curriculum Programme for the in-company tutors

Interactive Web Platform

Self-Directed Learning Guide for in-company tutors on internationalisation activities

approach
