

2019-1-ES01-KA202-063864

Project duration: 01.10.2019 - 30.09.2021

Project 4 EXPORT is coming to its final step which is the finalization of all the Intellectual Outputs and presenting them to the wide audience.

The Curriculum Programme for the in-company tutors for upgrading internationalisation (IO2) is finished. All of the materials will be used in further work on IO3.

Currently the IO3 which is 4 EXPORT Interactive Web Platform is still under development and is being translated into all partners national languages. It consists of an Interactive Map where the visitor can find examples of good practices in the project's partnership countries. After clicking on the country marked on the map with green colour the companies functioning there are automatically marked on the list below. Their whole descriptions are available after choosing the option: „Read more”.

Apart from the Interactive Map the second element of the Interactive Web Platform is an E-learning platform for the in-company tutors. The materials and information included in the platform were developed in IO2. They will help in-company tutors to upgrade their knowledge about internationalisation and equip them with the right skills and competences for managing and delivering successful – high-quality training activities. The content of each module is presented in a short animated video explaining which learning objectives will be achieved by studying it. The videos were produced as an additional activity thanks to the allocation of the budget which could not be used for Transnational Project Meeting organised face-to-face.

The testing phase of the platform started in February 2021 and will be finished in August 2021 when 20 to 40 participants will test it and express their opinion about its functionality, content and quality.

The last Intellectual Output which is The Self-Directed Learning Guide is on its final steps, and it is being tested by a group of external evaluators from each partnership country. They are experts in the field of internationalization and VET education. The guide includes guidelines on how to use the materials produced, as well as activities and assessment tools to help the in-company tutors self-assess, track and improve their skills.

In the last month of the project all partners will organise Multiplier Events where the main objectives and achievements of the project will be presented to the interested stakeholders and target groups.
