

2019-1-ESO1-KA202-065864

Project duration: 01.10.2019 - 30.09.2021

The 4Export project is almost at its conclusion, testing the products that the partnership produced throughout the 2 years of its duration.

At the present date, the IO4 testing is almost done and the feedback received up until now is very positive. The testing consisted of a pilot course that took place in each partner country and its main aim was to combine self-assessment and peer assessment techniques. During the pilots, participants tested the MOOC and the Self-Directed Learning Guide in 4 distinct phases. During phase 1 the Self-Directed Learning Guide was created, allowing teachers and trainers to follow a blueprint of what the project developed and how the content should be evaluated through self and peer assessment. Phase 2, on the other hand, consisted of an introductory session where in-company tutors working with apprenticeships programmes for internationalization activities met the project trainers and presented the MOOC, the training methodology, and the Self-Directed Learning Guide.

Phase 3 consisted of a beta testing of the website and the MOOC, where the testers positively received the products produced by the partnership, and evaluated the content and its usability. Phase 4 is the final one and it will take place approximately at the beginning/mid-September. The fourth phase will consist of 4 different focus groups (1 for each partner country) where 5 in-company tutors who participated in phase 2 will test the materials produced by the partnership with 5 apprentices/job seekers, using the Self-Directed Learning Guide as a guidance tool during the focus group.

The other Intellectual Outputs have already been concluded and translated into the national languages of the partnership. The additional activities implemented by the partnership, the videos and the VET database center are already available on the 4Export YouTube channel and the project's website.

During the last 2 weeks of the 4Export project, the partners will organize the Multiplier Events (either face-to-face or online) with the stakeholders interested in the project's results.
